IT3150 - Windows Servers

Spring 2019 Syllabus

This class instructs students in the installation, configuration and administration of Windows Server 2016.

**Prerequisites:** IT1200 and IT2400 with a C- grade or better, or IT1200 and concurrent enrollment in IT2400 with instructor permission.

**Course fee:** $25, used to assist in maintaining CIT infrastructure.

**One section:**
- IT3150-01 TR 9am-10:15am Smith Computer Ctr 108
- **Final exam:** Tues April 30 at 9am

**Instructor:**
- [Jay Sneddon](#)
- Office: Burns 235
- Office hours: MWF 11am-11:50am, TR 8am-8:50am

**Objectives**

At the end of the course, students will be able to:

- Install Windows Server 2016
- Configure Windows Server 2016
- Administer Windows Server 2016
- Install and configure Active Directory
- Implement and deploy Group Policies
- Prepare to pass the MCSA: Windows Server 2016 (70-740, 70-741, 70-742) certification exams

**Resources**

**REQUIRED** [TestOut.com](#)

To purchase:

1 - Visit Testout
2 - Go to the course shopping page and enter the pricing code 14-232TA.
3 - Under LabSim Courses for Microsoft, select TestOut Server Pro 2016 Install and Storage ISBN 978-1-935080-65-7 to purchase and add to shopping cart. The price should be $129.
4 - Follow shopping cart directions to place your order
5 - When prompted enter school name exactly as Dixie State University
6 - Follow instructions on the order confirmation screen and /or your emailed invoice for accessing LabSim.
7 - Join Class IT 3150 Sp 2019

**Computer Resources**

You may use the computers in the Smith Computer Center. There will also be lab assistants to help you. These computers require a valid CIT username and password. If you do not already have a CIT login, visit [https://cit.dixie.edu/facilities/passwd/passwd.php](https://cit.dixie.edu/facilities/passwd/passwd.php) to create one, or ask a lab assistant to help you sign up for one.

**Course Information**

You are responsible for being informed regarding announcements, the schedule, and other resources posted on this website. Grading and assignments are managed at [https://dixie.instructure.com](https://dixie.instructure.com).

**Assignments and Exams**
**Assignments**

Assignments will be graded based on completeness and a grading rubric. Assignments build upon previous ones, as we will be building out a Windows server environment.

(See the Late Work policy for more information)

All assignments are due Saturday night at 11:59pm, unless otherwise noted on Canvas. The primary reason for this is the Smith Computing Center is not open on Sundays.

**Exams**

This course will feature weekly quizzes and four exams, culminating in a final.

**Grading**

Assignments, quizzes and exams each contribute to your point total. Assignments 20%, TestOut 20%, Quizzes 10%, Exams 25% and the Final is 25% of your grade.

Here is the grading scale: 

\[
\begin{align*}
&>= 94 = A \rightarrow 90 = A- \\
&>= 87 = B+ \rightarrow 84 = B \\
&>= 80 = B- \rightarrow 77 = C+ \\
&>= 74 = C \\
&>= 70 = C- \rightarrow 67 = D+ \\
&>= 64 = D < 64 = F
\end{align*}
\]

**Course Policies**

**Absences**

Students are responsible for material covered and announcements made in class. School-related absences may be made up only if prior arrangements are made. The class schedule on Canvas presented is approximate. The instructor reserves the right to modify the schedule according to class needs. Changes will be announced in class and posted to the website. Exams and quizzes cannot be made up unless arrangements are made prior to the scheduled time.

**Time**

Courses should require about 2 hours of outside work per lecture hour of class. This class will require about 6 hours of work per week on the part of the student to achieve a passing or higher grade. Be sure to evaluate your schedule before committing to this course.

**Late work**

Assignments are due on the date specified in the schedule. The instructor has the right to reject any late assignments.

**Cheating and Collaboration**

Limited collaboration with other students in the course is permitted and encouraged. Students may seek help learning concepts and developing programming skills from whatever sources they have available, and are encouraged to do so. Collaboration on assignments, however, must be confined to course instructors, lab assistants, and other students in the course. See the section on cheating.

Cheating will not be tolerated, and will result in a failing grade for the students involved as well as possible disciplinary action from the college. Cheating includes, but is not limited to, turning in homework assignments that are not the student’s own work. It is okay to seek help from others and from reference materials, but only if you learn the material. As a general rule, if you cannot delete your assignment, start over, and re-create it successfully without further help, then your homework is not considered your own work.

You are encouraged to work in groups while studying for tests, discussing class lectures, and helping each other identify errors in your homework solutions. If you are unsure if collaboration is appropriate, contact the instructor. Also, note exactly what you did. If your actions are determined to be inappropriate, the response will be much more favorable if you are honest and complete in your disclosure.

Where collaboration is permitted, each student must still create and type in his/her own solution. Any kind of copying and pasting is not okay. If you need help understanding concepts, get it from the instructor or fellow classmates, but never copy another’s written work, either electronically or visually. It is a good idea to wait at least 30 minutes after any discussion to start your independent write-up. This will help you commit what you have learned to long-term memory as well as help to avoid crossing the line to cheating.

**College Policies**
Additional college policies, calendars, and statements are available online at [http://new.dixie.edu/reg/syllabus/](http://new.dixie.edu/reg/syllabus/).
