Assignments

**Detailed Learning Objectives**

You are required to come up with at least 3 learning objectives that you are planning on completing for the duration of the course. This should be emailed to your instructor as a pdf document by the end of the **second week** of the semester. You should meet with your instructor to discuss these prior to submitting your document. Make sure that your document follows appropriate spelling and grammar conventions. Bullets and subheadings can also be nice.

**Research and Progress Reports**

Your initial report describes your project objectives, outlining why the project is needed and what the final outcome is envisioned to be. See Canvas for more details.

You are then required to submit a progress report at the end of:

- Week 2 (this is the initial report that includes the three learning objectives)
- Week 4
- Week 8
- Week 12

Your progress reports should consist of the following:

- How many cumulative hours you have spent on your learning objectives.
- What research you have done.
  * What did you need to learn that you didn't already know.
  * Appendix with links to research materials in appropriate APA style.
- What you have implemented.
  * You should discuss what you have done with your learned research in obtaining your learning objectives.

Specific outline of your reports are specified in the Report Outline found on Canvas.
