Generals Advice

Math

The CIT degree requires MATH 1100 or MATH 1210. We recommend taking the appropriate prerequisites to lead towards one of those classes.

Sample Math Chain
MATH 1000 > MATH 1050 > MATH 1100
MATH 1000 > MATH 1080 > MATH 1210

Please also be aware that math scores expire after 2 years. If you haven’t taken math in 2 or more years, you will be required to take the Math Accuplacer test and see what class you can test into. For this reason, we recommend taking care of math classes as soon as possible.

CIS 1200

The CIT degree requires both CS 1400 and CS 1410. Together, these classes fulfill the CIS 1200 generals requirement. You will not need to take CIS 1200.

AP CLASSES & PRIOR COLLEGE COURSEWORK

If you have any taken any courses prior to coming to college that would count towards your CIT degree, you may need to see a CIT advisor to get them recognized by the CIT Department.
